

HELP PROTECT

LAKE MASSAPOAG

Our lake is being threatened and Community Center Beach is being closed by bacteria harmful to our health:

-*E. coli*

-Cyanobacteria (blue-green algae)

Here are some ways that *you* can help! Please...

- Take Care of Your Septic System
- Build a Rain Garden or maintain a Water Efficient Lawn
- Use Phosphorus-Free Fertilizer on Your Lawn
- Wash Your Car at a Car Wash
- Pick Up Your Pets Waste - Put it in the Trash
- Don't Feed the Ducks and Geese at the Lake

We must all work together to help protect our lake!
